SITE ANALYTICS REPORT

2026

Risk Analysis Report

Project	Riverside Mall Expansion
Location	Islamabad
Period	07 May 2026 to 14 May 2026
Generated	14 May 2026, 23:58 PKT
Overall Risk	MODERATE (Score: 38/100)

Executive Summary

The Risk Analysis Engine has evaluated **2 monitoring zones** on this project. The project-level risk score stands at **38/100 (MODERATE)**. No zones are currently at critical or high risk level. Across all monitoring sources, **12,215 open incidents** remain unresolved since project start (2,794 PPE, 9,277 workforce, 144 activity).

Risk KPI Snapshot

38	0	12,215	0	2
Risk Score (P95)	High-Risk Zones	Open Incidents	Compound Risk Zones	Zones Monitored

Open Incidents by Feature (Project Start to Date)

Feature	Open Incidents	% of Total	Status
PPE Violations	2,794	23%	Requires Attention
Workforce Alerts	9,277	76%	Requires Attention
Activity Alerts	144	1%	Requires Attention

Zone Risk Breakdown

Zone	Overall I	PPE Risk	Workforce Risk	Activity Risk	Risk Level	Trend	Compound
B	38	80	28	6	MODERATE	→ Stable	—
A	37	80	17	12	MODERATE	→ Stable	—

Risk Score Dimensions

Dimension	Avg Score	Status	Weight	Description
PPE / Safety Risk	80/100	Critical	35%	Counts open PPE violations from project start. Resolved violations auto-reduce this score.
Workforce / Delay Risk	9/100	Low	40%	Measures idle time, understaffing, and open workforce alerts from project start.
Activity / Productivity Risk	23/100	Low	25%	Measures motion intensity, utilization, idle ratio, and open activity alerts.

Top Risk Factors (Aggregated Across All Zones)

Risk Factor	Total Impact	Zones Affected	Detail
2117 open PPE violations	50	1	Unresolved PPE incidents from project start
677 open PPE violations	50	1	Unresolved PPE incidents from project start
2071 critical violations	30	1	Multiple critical PPE breaches (both helmet and vest missing)
653 critical violations	30	1	Multiple critical PPE breaches (both helmet and vest missing)
Low motion intensity	16	2	Motion intensity score 0/100
Low utilization 5%	9	1	Workforce utilization 5% — below 40% threshold
8071 open workforce alerts	6	1	Accumulated open workforce alerts from project start
1 idle workers	6	1	100% of workforce is idle
141 open activity alerts	6	1	Accumulated open activity alerts from project start
Low activity score	6	1	Activity score 0/100

Current Weather Conditions

Condition	Clouds
Temperature	27°C
Wind Speed	10 km/h
Rainfall	None

This report was generated automatically by ConstructionSight-AI on 14 May 2026, 23:58 PKT. Risk scores reflect the latest scheduler cycle results. Resolving open incidents will reduce corresponding risk scores on the next analysis cycle.
